

Increase and replacement of MPLS

Connectivity by Convergia

ABC, producer and distributor of Pepsi Cola products, operates in seven states, with more than 1,200 employees in 30 facilities.

The company's needs overloaded the private network, so they installed 460 devices with internet access to track factorization transactions in situ and inventory control.

Therefore, **FatPipe** and **Convergia** provided a private network with an encrypted Internet network, providing reliability, security and a failover system.

As a result, the elimination of delays in the daily flow of information. Allowing encryption and authorization so that company representatives can work from anywhere, quickly and safely (**Road Warrior**).

Likewise, the migration of **MPLS** to the internet was enabled.
